

Meeting #17

December 28, 2022

The following reflects the proceedings from the seventeenth (17th) meeting held of the Software Transparency Foundation on December 28th , 2022 at 9am (CET).

The meeting was called to order by Mr. José María Lancho and was held via video conference.

ATTENDEES:

The following attendees participated in the meeting:

Mr. José María Lancho Rodríguez

Mr. Julian Coccia

The following attendees, representing sponsors and guests, participated in the meeting:

Mr. Ismael Navas (University of Malaga)

Mr. Alberto Gomez (SCANOSS)

AGENDA ITEMS:

1. Opening comments

Mr. Lancho Rodríguez thanked everyone for participating and opened the meeting. The meeting will be rather short due to low attendance during the holidays.

2. Sponsorship program

The University of Macedonia has now formally joined the Software Transparency Foundation. A project is being coordinated with our sponsor SCANOSS to research Technical Debt in Java code across the entire Open Source community.

3. Project Office Updates

Due to the holidays, the OSSKB utilization was not available during the meeting, but it was received right after the session concluded. Traffic has drastically increased by tenfold in December. Measures will be taken to increase capacity immediately, since overload has been detected in some scanning nodes.

The mirror deployment at the University of Malaga is still to be scheduled. Mr. Navas will look for options to provide a speech at the University to raise awareness on Open Source license compliance and security.

SCANOSS is about to release PURL to CPE relations as free data. This dataset is the missing link that prevents developers from connecting their Open Source vulnerabilities with their known vulnerabilities. The Foundation will discuss options to add vulnerability information to the OSSKB service.

5. Closing comments

Mr. Lancho Rodriguez closed the meeting and scheduled the next meeting for January 27th at 9am (CET).
